

*Why do you want to be a data scientist/analyst?*

In my view, Data science and Machine Learning are exciting fields compared to several legacy systems.

Data Scientist job been the hottest job, **data scientist** brings in skill sets and knowledge from several fields such as mathematics, statistics, analytics, modeling, and different businesses. These skills find patterns in data which helps the businesses to recognize new opportunities in sales and marketing.

*Why do I want to work at this company?*

I have researched about this company, which encourages the employees to use creativity in data cleaning , wrangling, visualization and modeling to help the management reach its goals

*Tell me about a time you had to handle a conflict with your colleagues.*

Well, conflicts can come when two different minds have to work together either in a family or business. We have to explain our point of view with facts. Even then not able to convince, then we have to make deals and compromises
